Talaria 'Sting' R L1E 3500w 60V 45Ah Road Legal Electric Moped

The 'Sting' R L1E Road Legal Electric Moped

The Talaria production company was founded in 1996, and are mainly engaged in R&D, manufacturing, sales and international motorcycles trade and related products. The company is located in Chongqing, China, which is the 'Silicone Valley' for EBike production in the country and already boasts an annual turnover in excess of \$50M US. The factory encompasses 5 production lines, with more than 800 employees, including 180 engineering and technical development staff. The company has a rich history of motorcycle, tricycle, engine, and more recently electric motorcycle manufacture, to a worldwide market. Well established exports are in place for South Africa, Africa, the Middle East, Southeast Asia to name a few, but the European market is seen as a growth area for the electric market. They have an annual production capacity of 200,000+ electric motorcycles, in addition to their other manufacturing commitments. The company goals are "quality of product, efficiency, innovation and development" In the future, the company aim is to deliver technological innovations and ever improving service, while providing high quality products for customers.

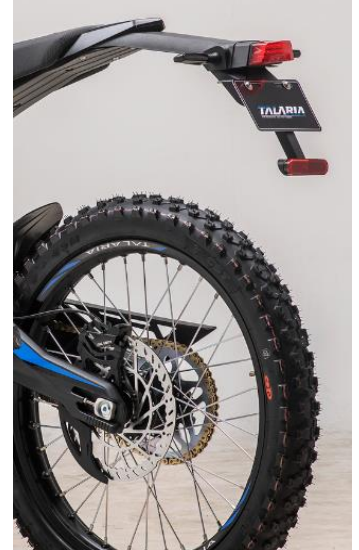

The 'Sting' is the creation from a group of engineers, that previously helped develop the earlier market leading electric motorcycle. However, they were convinced that they were able to develop their own design, improving the product in many ways. These include a higher seat height, larger battery capacity, wider swing arm, wider rear tyre, 4 level adjustable braking regen and overall styling of the bike too. The 'R' models also boast the increase in power from 6Kw to 8Kw, a larger Ah battery for increased range, 220mm rotors for improved braking to name just a few of the developments. The result is a bike that offers the rider a wealth of design innovations and a stylish bike to take on any terrain.

Talaria 'Sting' R L1E 3500w 60V 45Ah Road Legal Electric Moped

The Homologated L1E Road Legal Talaria 'Sting' offers the freedom of a lightweight city commuter, combined with the off road capabilities of the 'Sting' MX model. As an L1E category vehicle the rider requires the 'AM' or 'P' class on their licence, to complete a CBT course and hold valid motorcycle insurance. As a Moped equivalent this allows a rider over the age of 16 to ride on the road, once they meet the required DVLA criteria. As many UK cities are focusing on emissions and closing to conventional vehicles, the Talaria 'Sting' R L1E Electric Moped offers a perfect blend of city commuter and recreational vehicle with Zero cost Road Tax..

*The Talaria 'Sting' R L1E is homologated for use on the road as a DVLA registered moped. Thus the bike is supplied as 3500Kw, restricted to 28mph. The RRP excludes the £55 DVLA registration fee.

STING R L1E 'EXPERT EDITION' – Additional £800 inc VAT*

The Sting R MX 'EXPERT EDITION' is the premium model in the Talaria range, offering the Manitou Dorado Expert Forks as standard. For almost two decades, the Dorado has rewarded riders with unrivalled suspension performance and on-trail precision. The newest rendition stays true to its heritage with an inverted design, but this is where the similarities end. Featuring a new 37mm chassis, fresh internals, and new material options. A 37mm proves to be the perfect balance of increased stiffness, weight savings, and an ideal seal surface area for reduced friction. For more information on these performance forks:
