Talaria 'Sting' R MX 8000w 60V 45Ah Electric Off Road Motorcycle

Full Power on demand Hi Speed Electric Motorcycle

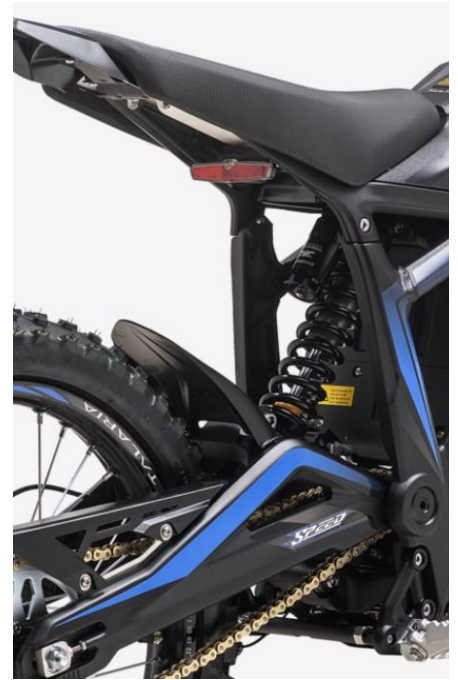

The Talaria production company was founded in 1996, and are mainly engaged in R&D, manufacturing, sales and international motorcycles trade and related products. The company is located in Chongqing, China, which is the 'Silicone Valley' for EBIke production in the country and already boasts an annual turnover in excess of \$50M US. The factory encompasses 5 production lines, with more than 800 employees, including 180 engineering and technical development staff. The company has a rich history of motorcycle, tricycle, engine, and more recently electric motorcycle manufacture, to a worldwide market. Well established exports are in place for South Africa, Africa, the Middle East, Southeast Asia to name a few, but the European market is seen as a growth area for the electric market. They have an annual production capacity of 200,000+ electric motorcycles, in addition to their other manufacturing commitments. The company goals are "quality of product, efficiency, innovation and development" In the future, the company aim is to deliver technological innovations and ever improving service, while providing high quality products for customers.

The 'Sting R' is an evolution of the original Sting model, now increasing the overall power to 8000W and increasing the battery to 45Ah. This has increased motor torque by 30%, improving range or increasing torque and acceleration, depending how the bike is ridden. The Forks and Rear Shock have both been customized to the 'Sting R' specifically, for maximum performance. The result is a bike that offers the rider a wealth of design innovations and a stylish bike to take on any terrain.

Talaria 'Sting' R MX 8000w 60V 45Ah Electric Off Road Motorcycle

STING R MX 'EXPERT EDITION' – Additional £800 inc VAT

The Sting R MX 'EXPERT EDITION' is the premium model in the Talaria range, offering the Manitou Dorado Expert Forks as standard. For almost two decades, the Dorado has rewarded riders with unrivalled suspension performance and on-trail precision. The newest rendition stays true to its heritage with an inverted design, but this is where the similarities end. Featuring a new 37mm chassis, fresh internals, and new material options. A 37mm proves to be the perfect balance of increased stiffness, weight savings, and an ideal seal surface area for reduced friction. For more information on these performance forks:
