## **2023 Talaria 'X3' MX 5000w 60V 40Ah Electric Off Road Motorcycle**

### ***Entry Level - Quality Hi Speed Electric Motorcycle***

The Talaria production company was founded in 1996, and are mainly engaged in R&D, manufacturing, sales and international motorcycles trade and related products. The company is located in Chongqing, China, which is the 'Silicone Valley' for EBike production in the country and already boasts an annual turnover in excess of \$50M US. The factory encompasses 5 production lines, with more than 800 employees, including 180 engineering and technical development staff. The company has a rich history of motorcycle, tricycle, engine, and more recently electric motorcycle manufacture, to a worldwide market. Well established exports are in place for South Africa, Africa, the Middle East, Southeast Asia to name a few, but the European market is seen as a growth area for the electric market. They have an annual production capacity of 200,000+ electric motorcycles, in addition to their other manufacturing commitments. The company goals are "quality of product, efficiency, innovation and development" In the future, the company aim is to deliver technological innovations and ever improving service, while providing high quality products for customers. Since their move into the electric market with the Sting model the Talaria brand has built an ever growing fan base, as it establishes itself as a strong player in the field. With the introduction of the newer 8Kw Sting R models in early 2023, many would argue that Talaria have become the 'go to' brand in the market, offering both value and performance.

## **2023 Talaria 'X3' MX 5000w 60V 40Ah Electric Off Road Motorcycle**

The 'X3' MX' is a further expansion of the Talaria range of Electric Motorcycles and stands alongside the initial Sting models. The 'X3' is aimed at increasing the overall availability of the range to those on a lower budget, yet retaining most of the great features of the original range. The 'X3' still boast a powerful 5000W peak power and a newly designed battery to 40Ah, distributed across the frame of the bike. The PTC (Pack to Chassis) design enhances the strength of the frame and also adds protection for the batter. The battery has also maintained a healthy range, depending how the bike is ridden and other factors such as rider weight, terrain. The Forks and Rear Shock have both been customized to the 'X3' specifically, for maximum performance. The result is a bike that offers the rider a wealth of design innovations and a stylish bike to take on any terrain. It's new stylish design offers a well balanced and agile ride, as well as other innovations, such as the NFC keyless start. The 'X3' offers an ideal first step into the electric lifestyle.

The 'X3' MX 'EXPERT EDITION' is the premium model in the Talaria range, offering the Manitou Dorado Expert Forks as standard. For almost two decades, the Dorado has rewarded riders with unrivalled suspension performance and on-trail precision. The newest rendition stays true to its heritage with an inverted design, but this is where the similarities end. Featuring a new 37mm chassis, fresh internals, and new material options. A 37mm proves to be the perfect balance of increased stiffness, weight savings, and an ideal seal surface area for reduced friction. For more information on these performance forks:
